

SUMMARY

I am specialized in operations analysis and operations management, with an interest for operations research, supply chain management, and really anything business relevant. What drives me is optimization, and the satisfaction of being able to see improvements, e.g. in KPIs or revenue etc. Previous experiences show that when an interest or a curiosity emerges in me, I will tirelessly work on said interest, for instance in understanding quantum mechanics. I have a high sense of detail, and can dig to find and evaluate the tiniest problems, while still seeing the bigger picture. I am a humorous, energetic, well-oiled machine, whose only flaw is my consumption of coffee.

EDUCATION

Industrial Engineering Management - 2021

Master, The Technical University of Denmark

Thesis OPTIMIZATION OF THE INVENTORY ROUTING PROBLEM FOR ECCO SKO A/S IN RUSSIA

An MSc programme that combines the field of engineering with planning, innovation, and management competencies, with a specialization in *Management and Analysis of Operations*: Utilization of Operations Management and Operations Research to focus on quantitative management and engineering methods to effectively **plan and control** production systems and networks from the strategic down to the operational level.

Operations Research Optimization Julia JuMP
Operations Analysis Operations Management
Supply Chain Management LCA Economy Lean
Planning Scheduling Benders Dantzig-Wolfe
Metaheuristics

Eng. Physics and Nanotechnology - 2017

Bachelor, The Technical University of Denmark

Thesis QUANTUM INFORMATION TECHNOLOGY WITH QUANTUM DOTS IN NANOWIRES

Rigorous training in advanced mathematics in terms of modelling as well as application, which utilizes tools such as programming, data processing and simulation.

Advanced Engineering Mathematics MATLAB
Python Java C Data Mining Machine Learning
Parallel Programming Project Management
Statistics Data Analysis

WORK

Student Programmer / 2017 - 2019

Nine A/S - Copenhagen

As a student programmer in a IT consultancy firm, I carried out company internal tasks, which helped me develop as a **software engineer**. These various tasks included using technologies such as Docker, Jenkins, ELK Stack whereas the Docker skill was utilized within the Danish Business Authority (Erhvervsstyrelsen), where I as a student programmer assisted on integrating the Danish CVR database into a cloud solution. There has been done frontend development in Angular and Vue, however to a minimal degree since I worked primarily on backend and devops tasks. Furthermore, I did practical internal tasks such as automating a shell script to move the G-Suite domains, and setting up A/V solutions for streaming and recording, e.g. conferences.

Jenkins Azure Google Cloud AWS Git Docker
ELK Stack Node.js Angular Vue PostgreSQL
Tomcat

SKILLS

Programming Languages: Python, C, Java, Julia, MATLAB, Bash

Human languages: Danish, English

Tools: Julia, JuMP, CPLEX, Git, Docker, Jenkins, AWS, Azure, Google Cloud, Angular, Vue, PostgreSQL, Tomcat, ELK Stack, \LaTeX , Microsoft Office

Other: CI/CD, Web, Data science and ML, Cloud computing

OTHER PROJECTS

- Part of the university sketch show, **PF Revyen** (2016-2020), both on stage with performing and writing acts and music, and back-stage organizing the show.
- Part of the university sketch show steering committee, **PF Humor**, **planning, scheduling and organizing** a show consisting of ~70 engineering students, **communicating** with other departments of PF (Polyteknisk Forening), **leading** day-to-day activities, and **economically responsible** with a budget around DKK 175.000.
- Composing and producing music at **RosenRecords**. Furthermore, developing podcasts and making Python scripts calculating distributions of royalties

CERTIFICATIONS

- ISO 21500 Project Management

ACTIVITIES / INTERESTS

Proactive about learning and grinding. I have a big passion for music, which caused me to establish RosenRecords. Favorite physical activities would be football, which I have played for five years in my younger days, and I follow professional European football, where the team aspects seems to satisfy me the most, since I was not the most individually/technically skilled player. Furthermore, I have recently become interested in martial arts.
